

ACER is aware that ProctorU, the service used to administer GAMSAT online, is investigating a breach of confidential data.

We understand this breach relates to users registered with ProctorU in or before 2014. This is before ACER used the service and it therefore does not affect any of its tests.

ACER takes data security very seriously and regularly reviews security and privacy policies and measures. You may view ACER's Privacy Policy at <https://www.acer.org/privacy> and the privacy statement of the test at https://gamsat.acer.org/files/GAMSAT_Privacy_Statement_2020.pdf

You may also like to find out more about ProctorU privacy and security at: <https://www.proctoru.com/privacy-policy>

Kind regards,

The GAMSAT Team
ACER
